

OBSTACLES OF TOBACCO FARMER

Abdus Setiawan
Asosiasi Petani Tembakau Indonesia (APTJ)

ABSTRACT

There are a lot of obstacles faced by tobacco farmers in developing their agribusiness. These obstacles can be identified as technical and nontechnical problems. Commonly, technical problems are related to farming management such as small holder land occupation, infertile and degraded land development, pest and disease accumulation, and inappropriate fertilize application. Nontechnical problems usually associated with off farm environment, such as increasing antismoking campaign, low banking capital gain, and partnership between farmers and industries weakness.

Key words: Tobacco, agribusiness, technical, nontechnical
